My Health My Resources (MHMR) of Tarrant County is one of 41 community mental health centers in the state of Texas. Through the Medicaid 1115 Waiver, MHMR developed a crisis prevention and intervention program based on the START model. Since program inception in 2014, START Tarrant has provided over 500 individuals with co-occurring IDD/ASD and behavioral challenges with systemic consultation, 24/7 crisis services, and access to the Resource Center. START Coordinators use the ABC, FEIS, and CSQ for treatment planning, implementation, and evaluation of the services provided. Analysis of available data supported the theory of change identified in the logic model indicating that START services are effective at maintaining individuals in their current setting during crises and reducing challenging behaviors as measured by the ABC. In the future, we would like to explore additional data trends identified during this process including crisis line and resource center utilization.
